

Freight Capacity Crunch?

**CAPACITY CRUNCH
AHEAD**

Unishippers can help you get your freight on the road.

Has your business shipping been impacted by the freight capacity crunch? Fewer driver candidates combined with an aging population, recruitment issues and the new Electronic Logging Device (ELD) mandate means that there are considerably fewer drivers on the road. The result of these trends are increased demand on shipping resources, capacity issues and increased rates as most LTL carriers try to make up for lost business.

As one of the largest buyers of LTL freight in the U.S., Unishippers can provide benefits that help minimize the impacts to your business, including:

Competitive rates

Leveraging the combined shipping volume of our customers helps ensure the most competitive rates for your shipping.

Access to trucks when you need them

Our long-term relationships with the best freight carriers in the business mean we're able to offer more capacity than the competition and help ensure that your freight makes it on the truck.

Industry-leading Platinum Service

As the leader in small and mid-sized business shipping, Unishippers can help you manage the capacity crunch—so you can focus on growing your business.
