

# A simpler, smarter way to manage your shipping.

We understand everyone's shipping needs are different. That's why myUnishippers™ was built from the ground up with the user in mind, giving you the flexibility your business needs to ship faster and more efficiently.

See what's happening across your business with dynamic dashboards

Compare services, rates and transit times from leading carriers

Save time and get support in the customer portal

Take tracking anywhere your business takes you

## An all-in-one shipping solution that puts you in control

With myUnishippers, you can create a quote, book and track UPS® small package and LTL freight shipments, manage your payment history and submit claims with a few simple keystrokes.

- Easily compare negotiated rates from our portfolio of 65+ industry-leading carriers
- Let myUnishippers help make smart shipping mode decisions based on shipment characteristics
- Save address books, package sets, commodities, mailing lists and other account preferences to speed up shipment creation
- Connect with your support team by submitting questions through the portal, getting you quick answers without the burden of emails or phone calls

## Increased visibility empowers smarter shipment decision-making

Up-to-date, actionable data increases your peace of mind and takes the guesswork out of shipping, while raising the visibility of your entire supply chain.

## Adaptable options help manage shipping spend

You can't afford to get shipping expenses wrong. Better manage their effects on your bottom line without ever leaving the myUnishippers platform.

## Practical tools seamlessly integrate to reduce keystrokes and errors

Integrate the quoting, booking and tracking functionality of myUnishippers with your custom-built TMS, warehouse management system or off-the-shelf ERP system with our fast, lightweight RESTful Web Service API that eliminates the need for repetitive rekeying of data between systems. Show real-time rates at your point of sale with Magento, Shopify and WooCommerce shopping cart plugins. Increase quote accuracy and reduce fulfillment guesswork by mapping products to packaging with our proprietary packaging algorithm. Partner with verified vendors to automate order processing, provide an on-brand buying experience and more.

- Use the account-specific dashboard to view shipment status, volume trends, distribution by weight, class and service level, a geographic heatmap of inbound and outbound activity, and more
- Select from detailed shipping reports or build your own, based on your shipping activity
- Follow real-time progress of shipments on the detailed tracking page, and set notifications so you and your consignee receive timely alerts along the journey
- File claims and invoice disputes, and stay current with their resolution, through the self-service portal
- Assign roles – Admin, Ship/Track, Pay and Vendor – to give your team greater flexibility for your Unishippers account
- Choose from paper, PDF, CSV, EDI or API invoice delivery on the day(s) that fits your business
- View and download invoice details and payment history online, including electronic and check payments
- Make invoice payments online in full or in part with a variety of payment options such as check, ACH and credit card\*
- Keep your team in-the-know with multi-recipient invoice delivery and 3rd party payor access
