

5 REASONS TO USE A FREIGHT MANAGEMENT SYSTEM

Learn how small and mid-sized businesses (SMBs) like yours save time and money on their freight shipping with a transportation management system (TMS):

1 GET AN INSTANT QUOTE ACROSS MULTIPLE CARRIERS

Eliminate the time and hassle of dealing with numerous carrier sites to prepare your shipments. With an online freight management tool, you can instantly compare costs and delivery options across multiple carriers — and quickly convert quotes to bills of lading (BOLs) for fast shipment scheduling.

2 EASILY TRACK ALL YOUR SHIPMENTS ON ONE PLATFORM

Once you begin booking shipments, a freight management tool can help you keep track of your cargo from point A to point B. And with one convenient login for all of your freight, shipment tracking is as easy as clicking a button.

3 REDUCE ERRORS AND SURPRISE FEES WITH SHIPMENT VALIDATION FEATURES

When preparing your shipments, a freight management system can provide tips to help you avoid hidden fees and receive accurate quotes right from the start.

4 QUICKLY PURCHASE SHIPMENT INSURANCE

With a freight management tool, you can easily purchase insurance at the time you book your shipment — ensuring your important goods are properly protected.

5 AUTO-SAVE PRODUCTS AND REFERENCES FOR EASY USE

Why waste valuable time repeatedly entering the same information when preparing your shipments? With a freight management system, you can easily store product and shipping information to automate future shipments.

myUnishippers™ is a one-stop solution for all of your freight shipping needs. With access to 75+ national, regional and local carriers, rest assured that you'll always find the best rates for your freight with Unishippers.
