

One shipping partner. All your LTL needs.

We have carriers where you are and where you need to go!

When you work with Unishippers' vetted freight, you work with the best! Our vetted freight carrier network ensures reliable, cost-effective shipping and offers consistent performance, high-quality service, and tailored solutions for diverse shipping needs.

We also give you options. With 75+ regional and national less-than-truckload (LTL) carriers, you've got the flexibility to choose what works best for your needs — all in one convenient place with Unishippers. Learn more about our freight network and view a map of our service hubs!

Unishippers Has an Industry-Leading Carrier Network

Unishippers goes above and beyond industry norms when selecting freight shipping carriers to ensure reliable and efficient service. We offer shippers access to our network of LTL carriers, chosen through thorough vetting processes. This includes evaluating carriers' reputations, conducting rigorous background checks, and assessing their safety ratings. For shippers like you, this means working with carriers known for their service quality.

Relationships and Technology

Unishippers values long-term relationships with carriers, which creates trust and enables better rate negotiations and capacity management. We also prioritize carriers who utilize advanced technologies such as electronic data interchange (EDI), application programming interfaces (API), and dimensionalizers for accurate freight handling. This results in efficient shipping, precise quoting and fewer billing surprises for you.

Full Suite of Solutions Including Insurance

Insurance coverage is another reason why our carriers are among the best. We ensure that LTL carriers have substantial liability and auto insurance to protect shipments against damage or loss. Additionally, we seek carriers that offer a range of services, from dry van to specialty shipping, catering to diverse needs.

Customer Support and Ongoing Reviews

Customer service is also key. Unishippers partners with carriers that provide excellent support, making the shipping experience smoother for shippers. And to maintain high standards, Unishippers continuously reviews carrier performance, compliance and technology use, ensuring they meet ongoing expectations.
